

Code challenge

We'd love to see how you work when facing a little challenge.

Create a layout and functionality similar to the attached specs. Expanders should work so, that only one is open at the time.

You may either build everything by yourself or use React as a base framework.

Bonus points:

- animations
 - o expander content should slide in/out smoothly
 - o opening arrows open/close state transition

Push your code to a public GitHub repository and send us a link.

Please send email, if you have any questions regarding to challenge.
